## What's New In FTP Explorer?

The FTP Explorer is a free, easy-to-use FTP client that offers all the power of the standard Windows file manager combined with the speed and reliability of an FTP client. It helps you to transfer files to your local computer and the internet by managing, opening and editing files from a friendly file manager. With FTP Explorer you can connect to many different servers and access the data directly in your computer. It is especially useful to archive, back up and secure your local hard drive by

storing all your data in a central online location. If you want to transfer files from your computer to other users, you can use FTP Explorer for that too. You can drag and drop folders and files from the Windows file manager directly into FTP Explorer, and vice-versa. FTP Explorer can also open and save files from your remote location, either by typing in the path name or selecting from the file list. You can edit the file in Windows Explorer, type in the address, and then transfer that file to your remote location. FTP Explorer comes with the FTP client set to automatically log in to servers and transfer files, but you can also manually connect to your server by typing in the address or by selecting a file. You can change the current directory to the path name of a folder or file you want to access and view the contents of that folder or file. FTP Explorer Features: FTP Explorer can transfer files and folders to FTP server by the standard File Transfer Protocol. FTP Explorer allows you to connect to many servers and transfer the data in your computer and your online storage. It can be configured to automatically log in to servers and transfer files and folders. You can also manually connect to the FTP server by typing the address or selecting a file. Drag and Drop: You can drag and drop files from Windows Explorer directly into FTP Explorer and vice versa. You can open any file that is on your local hard drive or from an FTP server and view the contents in the browser. You can edit any file with the standard Windows text editor, or you can set the text to the language and font of your choice. After changing the text you can use the FTP Explorer's Save As window to save the file. Upload and Download: You can upload files from your computer to an FTP server by drag-and-drop. You can download files from your FTP server to your local computer by drag-and-drop. Automatically login to FTP servers and transfer files: FTP Explorer comes with the FTP client set to automatically log in to servers and transfer files, but you can also manually connect to your server by typing in the address or selecting a file. Folder and Path Names: You can open the current directory in Windows Explorer and view the folder's path name
